CEO'S REMARK

It gives me a great pleasure to welcome you into **PRECISION ENERGY & PROCUREMENT SERVICES LTD**, a company formed to provide solution, sustainable energy and power to client across divers of economy sectors in Nigeria and Africa at large.

Our special focus is on engineering design, procurement, supply, fabrication, Installation and commissioning of oil and gas equipment for power plant, City-Gate, manufacturing industries and domestic utility.

Through our gas processing and distribution experience, we deliver Gas Processing facilities, Reducing Skid and Metering Skids for purposes such as direct Gas utilization for industries and Power generation companies. Categorically, we are an Oil and gas servicing company providing cost effective, clean, efficient, and sustainable energy solutions to meet the ever-increasing energy needs of the industrial, power, and commercial sectors of the economy.

Since the establishment of Precision Energy & Procurement Services Ltd, the company has grown to become an EPC (Engineering, Procurement and Construction) contractor in oil and Gas sector, manufacturing and the construction industries and an integrated player across the energy value chain for all stakeholders across board.

As an organization, we demonstrate resilience, creativity, and innovation in adapting quickly to the new energy landscape by a commitment to transit to cleaner energy. Our business is modeled to take advantage of these trends; specifically, our desire, in the long run is to fully maximize existing large reserves of Natural Gas in the country and Africa at large and ensure increased penetration and utilization of Natural Gas within the domestic and continental market.

It is our commitment as Precision Energy & Procurement Services Ltd. to conduct our business activities in such a way as to take account of health and safety of our staffs and other personnel who its activities impact upon, giving adequate regards to protecting the environment and to be in good harmony with our host communities in whose we carry out work, while keeping good security of the work places / materials and equipment's employed

We urge you to journey with us as we become a reputable integrated player across the energy value chain.

You will find a comprehensive review of our company past experience within these pages, even as we reflect on our growth, successes, and achievements within the industry and provide you with an outlook on what is to come.

At this juncture, we have arrived at a turning point for a new page as our employees including myself are aspiring to make a bigger and better, unlocking value across the energy value chain, delivering innovative and customized energy solutions to our partners while adopting world best practices and standard.

THE COMPANY BRIEF

PRECISION ENERGY AND PROCUREMENT SERVICES LTD is a wholly Nigerian company that got involved in the Oil & Gas business with full participation in the Construction of Shell's Agbara/Ota and Aba Gas Transmission and Distribution Project. The project was successfully completed.

The project was the first of its kind in Nigeria. The Project cuts across both the upstream and downstream levels. Although the operating pressures are relatively low, the network is designed to withstand very high-pressure levels and this gives it the required flexibility to meet several Industry demands.

Following the success of the Agbara/Ota project, and the acquired expertise, we have undertaken new partnership with foreign investors with a vision in the long term, for the manufacture of gas processing and metering facilities to satisfy the African market. Apart from contributing to the growth of the industry locally, this will also meet Government aspirations for increasing the local content in future Nigerian Oil and gas projects.

Multidisciplinary Engineering designs, including process designs Based on a solid construction background, we undertake multidisciplinary engineering design, ranging from civil, mechanical, and electrical and process design in line with customer needs and targets.

Our affiliation with other specialized companies avails us the technical support and the strength to cope with the most complex project scenarios whatever the driving force may be.

Provision of Project support and Inspection services

Construction of New Plant and Facilities

We execute construction of new plants and facilities, either on EPC basis or on joint ventures basis.

Modification and maintenance of existing facilities

In the field of modification, rehabilitation, revamping and maintenance of existing facilities, Close cooperation with customers and continuous benchmarking against their needs has driven us to meet their current plant demands, with maintenance and reduction of operating cost as the main objective.

Natural gas Facilities systems design and installation

Because Natural gas is safest, cleanest and most efficient burning fossil fuel and its help in addressing several environmental problems, such as smog, acid rain and green house effect on the environment. We are constantly improving on the various uses of natural gas.

This quest has leads us into the following area of natural gas utilization specializations

Construction of gas transmission, distribution and internal reticulation system, using

Welded steel pipelines

High density polyethylene pipe – (HDPE) using Electro fusion welding method

Supply of Natural gas equipment (Regulators, meters, burner and other accessories)

Construction and supply of Modular units

Plant modulization resolve difficulties related to construction

work in remote area, with minimum site installation and interconnecting activities required, we undertake construction of modules be it vessel or skid mounted facilities and transport them to your required location for installation and commissioning

Corrosion control – Monitoring and preventive works

In conjunction with our affiliates, we execute both internal and external corrosion control monitoring and preventive works, using latest technology

Civil Engineering works

We are also involving in the execution of civil engineering works; our experience includes but not limited to

- ♦ Facilities Constructions – Buildings, water distribution system
- ♦ Tank and Equipment Foundations
- ♦ Bulk Storage tank erection
- ♦ Pipe supports
- ♦ Steel structures and shelters
- ♦ Drainage systems
- ♦ Erosion control works
- ♦ Roads (Both flexible and ridge pavements)

Mechanical Piping Works

We execute both mechanical and piping works, our strength in this area lies in our core team of tested engineers who collectively has laid more than 500km of pipelines across various terrains be it river crossings, swamp flow lines, station piping systems in pipe diameter of various sizes (1/2 – 36 inches).

Electrical works

We execute the installation of power distribution systems, earthing and lightning protection installation, cathodic protection system installation, cable routing and supply of cable trays

ABOUT US

Precision Energy is a company formed to provide engineering services to the Oil and Gas, Manufacturing and Processing industries in Nigeria, with a special focus on Design, Procurement, Fabrication, Installation, and Commissioning of plants and facilities for natural gas and construction industry in general.

Precision Energy & Procurement Services Ltd was duly incorporated in 2012.

This autonomous lead to constant development, has positioned the company as an EPC (Engineering, Procurement and Construction) contractor to Oil & Gas, Manufacturing, Processing and the construction industries.

Drawing from its past experiences, the company has developed its resources and expertise in the following:

OUR SERVICES:

- Multidisciplinary Engineering designs, including process and Gas facilities designs.
- Procurement and installation of Natural gas equipment
- Construction of new plant and facilities
- Modification and maintenance of existing facilities
- Supply of maintenance spares for gas facilities.
- Electrical and instrumentation Control
- Design and Installation of PLC
- Installation and commissioning of CNG Plant
- Installation and Commissioning of LPG plant
- Provision of technical support services such as:
- Project management team
- Man power supply
- Quality control and assurance personnel (QA/QC)
- Commissioning and start up plant
- Civil works

HSES BRIEF

It is the policy of **PRECISION ENERGY AND PROCUREMENT SERVICES LTD** to conduct its activities in such a way as to take account of health and safety of our staff and other persons whom our activities impact upon, give adequate regard to protecting the environment and be in good harmony with the communities in whose places we carry out work, and also keeping good security of the work places/materials and equipment's employed.

We will pursue this policy with high standard of workmanship, sound company strategies, visible management commitment and with the contributions of all staff, and improving staff knowledge, awareness and safety skills via consistence training.

We work on the premise that all incidents and accidents are preventable and seeks to achieve this as practicable as possible.

Therefore, activities shall only be undertaken when a safe manner has been established for execution.

"No work activity shall be carried out if the work condition / environment is unsafe for such operations."

Efforts will be made by to reduce/minimize emissions, effluents and discharges of waste materials.

As a corporate body and in all her operational sites, shall comply with all applicable and prevailing government laws and regulation guiding its operations.

In furtherance to the above, we shall continuously seek better ways to improve its operations.

Signed

Engr. Akin Olanlokun
